Education

Addis Ababa University

October 2021

Bachelor of Science in Computer Science (GPA: 3.72 / 4.00)

- **Relevant Courses:** Data Structures and Algorithms (C++), Computer systems and networks, Security, Database Systems, Human-Computer Interaction, vision and graphics, numerical analysis, programming languages, Prob & Stat in CS (Python), Intro to CS II (C++)

Experience

Atlas Computer Technologies

Jun 2026 – Present

Backend Team Lead

Addis Ababa, ETH

- Took part in designing Ethiopia's Integrated Tax Administration System, a critical platform being built to operate at nationwide scale.
- I oversee the development of Spring Boot microservices for the system, I'm also involved in deployments, incident troubleshooting, performance optimization and architectural decisions.

ONEOK

Mar 2024 - Jan 2026

Full Stack Developer

Remote(US Company)

- Took part in designing and implementing a web app called SWIFT which is used by company clients.
- Designed secure RESTful APIs and microservices with Spring Boot.
- Implemented automated unit testing suites using Jest and Enzyme, driving a 40% + increase in overall test coverage

Upwork

Nov 2023 – Aug 2024

Android App Developer

Remote

- Developed a variety of apps including AI powered OCR, puzzle games, etc using Kotlin, Java, and React Native.
- Received very positive feedback from my clients for the work I have done.

Ashewa Technology Solutions

Apr 2021 – Jul 2023

Frontend Developer

Addis Ababa, ETH

- Restructured the frontend using React, establishing modular components and a clearer separation of concerns to speed up future development.
- Fixed usability bugs, optimized app speed, conducted code reviews, and helped steer core technical decisions.

4KBots

Feb 2019 – Jan 2021

Software Engineer

Addis Ababa, ETH

- Implemented Image processing python scripts, enabling our robots to detect soccer ball and navigate through a field.
- Developed an Android app that utilizes the powerfull camera and processing power of mobile phones for our robots, reducing coast by removing the need for camera and Raspberry Pi
- Introduced decision making system using SVM(support vector machine) and (DNN)Deep Neural Network

Personal Projects

SmartQ | *Next.js, Node.js, Redis, MySQL*

- SmartQ replaces physical lines with virtual tickets. Customers join the line via SMS, WhatsApp, or QR code scan, and get notified automatically when it's their turn. www.smartqapp.com

OCR for Amharic | *Android, Kotlin, Java, OpenCV, TensorFlow, Tesseract*

- Developed A fast and offline working OCR Android App for Amharic language
- Combined OpenCV image processing with Tesseract OCR engine for optimized outcome.

Technical Skills

Languages: Dart, JavaScript, Typescript, Java, Kotlin, SQL, Python, C, C++, PHP, Bash, C#, Dart

Technologies: Flutter, React.js, Next.js, Vue.js, Node.js, Android SDK, EJS, React Native, Firebase, MongoDB, Flutter, TensorFlow, Qt, Laravel, Spring Boot, Express.js, JQuery, Bootstrap

Achievements

Winner on 2019 African Robot Soccer Competition - Organized by ICoGLabs with the Ethiopian Ministry of Science and Technology
